

Engineer your success with us

True Grit Consulting Limited is Northwestern Ontario's fastest growing locally owned and operated engineering firm with over 30 professionals.

We have immediate career opportunities in Thunder Bay as we continue our strategic growth towards becoming the region's premier provider of engineering and consulting services.

Manager, Engineering Services

True Grit has an immediate Corporate Management opportunity to lead and grow the company's Engineering division. This highly motivated individual with excellent technical, people, business development and project management skills will play a key leadership role in the growth and development of the firm's engineering and contract administration capabilities. A new certified materials testing laboratory and team of survey, design and technical staff await your direction. Our existing client's include, municipalities, industry, First Nations, construction and developers.

The successful candidate will have proven project management organizational skills and a demonstrated ability to lead diverse technical work and project teams. Candidates will be eligible for PEO registration with a minimum of 10 years of civil/municipal or environmental engineering experience.

This corporate position qualifies for our exceptional compensation and benefits package including potential ownership options based on candidate qualifications.

Geotechnical Engineer

True Grit requires an experienced geotechnical engineer to enhance existing civil and earth sciences services. Your experience in soil investigations, materials analysis, retaining structures and foundations will form an integral part of the firm's services for industry, commercial development and expanding municipal and transportation sectors.

Working knowledge of relevant engineering design standards, codes, best practice guidelines, technical references and regulatory requirements is essential. The successful candidate will play a key role in the development of the division's project management team, staff mentorship and client communication. State of the art field instrumentation, a new materials testing facility and experienced management and field teams are available to support your role. An ideal candidate will bring a minimum of 7 years of combined field and office based experience, an engineering degree in civil or geological engineering and be eligible for registration with the PEO.

True Grit offers a progressive employee compensation and benefits program.
