**Full-Time  
Position  
in Sudbury**

### **Project Manager, Construction Specialties**

You have great people skills and are familiar in dealing with contractors. You can demonstrate you are reliable and can work independently. You will be responsible for pre-job planning to coordinate projects including: scheduling jobs, arranging installers, reviewing drawings, performing site inspections & material lists. You will also be required to supervise and assist the installation team and projects from start to finish of products, such as, shelving & racking, mezzanine floors, dock equipment, lockers, toilet partitions, folding walls and other modular construction specialties. The ability to read basic blueprints, complete take-offs for quoting/estimating purposes and a Post Secondary education in drafting (AutoCAD), engineering, construction technologies or related field experience would be an asset. A valid driver's license is required as out of town travel is occasionally required.

---
